

## Teklad Global High Fiber Guinea Pig Diet

**Product Description-** 2041 is a fixed formula, non-autoclavable diet manufactured with high quality ingredients and designed to support all stages of the guinea pig's life cycle. Contains added stabilized vitamin C (L-ascorbyl-2-polyphosphate) extending the shelf-life to six months from date of manufacture. **Also available certified (2041C) and irradiated (2941).**

**Ingredients** (in descending order of inclusion)- Dehydrated alfalfa meal, wheat middlings, dehulled soybean meal, ground corn, soybean hulls, ground wheat, soybean oil, dicalcium phosphate, iodized salt, L-ascorbyl-2-polyphosphate, calcium carbonate, kaolin, magnesium oxide, vitamin E acetate, menadione sodium bisulfite complex (source of vitamin K activity), manganese oxide, ferrous sulfate, zinc oxide, copper sulfate, niacin, calcium pantothenate, pyridoxine hydrochloride, riboflavin, calcium iodate, thiamin mononitrate, vitamin A acetate, vitamin B<sub>12</sub> supplement, folic acid, biotin, cobalt carbonate, vitamin D<sub>3</sub> supplement.

Vitamin C (ascorbic acid)	mg/kg	1050

<sup>a</sup> Ether extract is used to measure fat in pelleted diets, while an acid hydrolysis method is required to recover fat in extruded diets. Compared to ether extract, the fat value for acid hydrolysis will be approximately 1% point higher.

<sup>b</sup> Carbohydrate (available) is calculated by subtracting neutral detergent fiber from total carbohydrates.

<sup>c</sup> Neutral detergent fiber is an estimate of insoluble fiber, including cellulose, hemicellulose, and lignin. Crude fiber methodology underestimates total fiber.

<sup>d</sup> Energy density is a calculated estimate of metabolizable energy based on published predictive equations for rabbits (de Blas & Wiseman, *The Nutrition of the Rabbit*. CABI Publishing, 1998).

<sup>e</sup> Indicates added amount but does not account for contribution from other ingredients.

<sup>f</sup> 1 IU vitamin A = 0.3 µg retinol

<sup>g</sup> 1 IU vitamin D = 25 ng cholecalciferol

For nutrients not listed, insufficient data is available to quantify.

Nutrient data represent the best information available, calculated from published values and direct analytical testing of raw materials and finished product. Nutrient values may vary due to the natural variations in the ingredients, analysis, and effects of processing.
